Sarah & Daniel

New owners of a beautiful Q-Line Kitchen

When we first built our home, it was initially important that we created an open plan kitchen with a dining area to adhere to the accessibility and the natural flow of an open plan. We planned to use our kitchen as an entertaining space as this is a big part of our lifestyle, so the kitchen/dining area was the perfect solution for creating this hybrid space to balance our day to day, with our time socialising.

At the beginning of our new kitchen renovation journey, we were very open to options of which kitchen supplier to use. After visiting our kitchen designers' showroom and their Q-Line recommendation, we were certain a Mereway kitchen had to be the choice for us. We wanted a contemporary kitchen, this is the stylish and simplistic theme we had gained from our inspiration and adored the ultimate handleless look. A decision was made pretty quickly after discussing this style with the designer, it was a no-brainer! We immediately fell in love with Q-Line's ceramic texture and the unique feel this offered. The look and feel of the whole kitchen was selling itself to us and in fact, nothing else would compare at this point so we knew we were making the right decision.

We are the type of people that have a large amount of kitchen bowls, glasses etc. So copious amounts of storage were very important to us and this was clear from our initial brief. The adapted storage features allowed us to live our daily lives with ease and we haven't had to go searching in the back of the cupboards since.

As Daniel is a wheelchair user, we wanted to make the kitchen adaptable and accessible to cater for both of us when it was time to prep meals. We are absolutely loving our kitchen and are so happy with the decision we made – we honestly wouldn't change a thing. It's just perfect and we always get a WOW when our friends and family come round.
